

Laura Lindsay

Director, Glass House

Director statement for ECCV's All One Together campaign

Glass House Child Safety Contracting respect and promote the dignity and integrity in all children and staff.

We are committed to acting against racism in the workplace and community by pledging to take the necessary steps towards positive change and continue an environment of acceptance. We strongly advocated for the National Principles and state-based Child Safety Standards that promote culture change in organisations from leadership through to frontline. This included policies and proceeded that strongly stand against racism in organisations and call it out and act upon it.

We aim to educate and embrace inclusivity and diversity amongst our learners, community members and team alike.

We cherish and value the contributions of all and welcome the ongoing commitment to antiracism education in our learning community.
